

Managed WiFi

Deliver secure WiFi—for employees and guests—without the hassle

FUSION CONNECT PROVIDES A COMPLETE, END-TO-END WIFI SOLUTION

Support the Influx of Wireless Devices

Connecting the growing number of wireless devices can be a challenge. With Fusion Connect Managed WiFi, you can expand your network to support the increasing number of customer and employee wireless devices—affordably.

Benefits include:

- Customize the welcome page and offer Facebook 'check-in' to promote your brand
- Gather important usage and presence data for offer targeting
- Gain visibility into your network users, devices and application
- Give employees freedom of movement to serve customers by using WiFi-enabled devices
- Lower costs by outsourcing your wireless network management and support
- Eliminate capital expenditures on equipment, training, technology upgrades, and dedicated resources

Fusion Connect Managed WiFi Includes:

- Network design
- Ongoing monitoring, configuring and troubleshooting performed by our knowledgeable Network Operations Center staff
- Firmware and software updates happen seamlessly, over the Web, so you get the latest upgrades and new features delivered to your access points and your management dashboard, automatically
- Help Desk support 24/7/365
- Summary reports delivered in a dashboard give you insight into your network and help you understand traffic, clients and application usage
- Lifetime warranty on access points

THE FUSION CONNECT ADVANTAGE

SINGLE SOURCE FOR THE CLOUD

Fusion Connect offers a full range of cloud communications, cloud connectivity and cloud computing solutions nationwide.

SUPERIOR VOICE QUALITY

Fusion Connect's voice network achieves 99.999% availability, providing customers with the highest level of availability in the industry.

PROVEN EXPERTISE

We've been serving businesses with innovative communications services for over two decades.

EXPERIENCED CUSTOMER SUPPORT

Our U.S.-based technical experts respond quickly and efficiently, 24/7/365.

A Complete Solution, Fully Managed

Fusion Connect includes everything you need for a robust, secure WiFi solution for employees and guests.

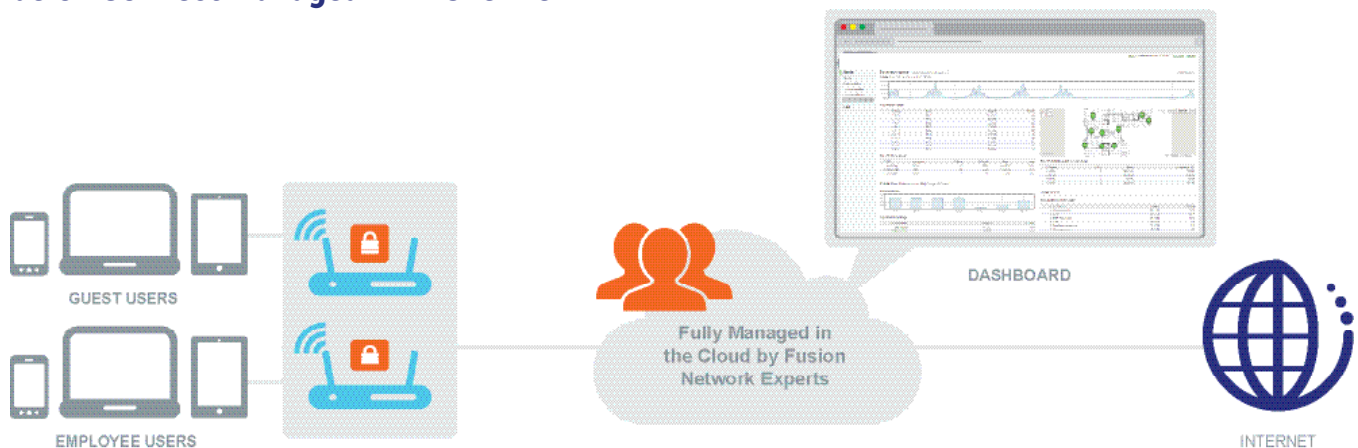

24/7 Monitoring and Management

Once the access points (AP's) are installed and the connection is made, Fusion Connect manages it for you. Fusion Connect can establish usage controls to support your business needs: giving real-time traffic such as voice data the highest priority across the network, for example.

Enterprise-grade, cloud-managed Access Points

- **Speed.** Access points feature advanced, enterprise-class 802.11ac and 802.11n technologies and support more than 100 users each.
- **Performance.** Our wireless access points have high-power radios and enhanced receive sensitivity. Multiple antennas and advanced signal processing (integrated optimization with real-time spectrum analysis enables high-performance wireless in dense, demanding environments).
- **Security.** Built-in security segments wireless users, applications and devices, securing your network from attacks and automatically enforcing the right access policies by device or user type.
- **Versatility.** AP's support both private (secure LAN) traffic for employees, contractors and business partners and public WiFi users.
